THE AQUAGLIDE ADVANTAGE

SUPERIOR DESIGN AND INNOVATION SETS US APART

Aquaglide has been at the forefront of aqua park innovation since day one. From simple water trampolines, to fully developed aqua parks, Aquaglide has designed and developed the gambit.

Our design team developed one of the first in-water attachment systems to allow secure modular connections. The Vario Interloc system is the foundation of every Aquaglide park because it allows quick and secure connections.

Aquaglide's relentless pursuit for excitement continues to lead to new innovations like the Universal Monsoon, Skyrocket, Monkey Dome and our new I-Hop and I-Beam balance series.

It is our passion to innovate. Design drives us to continually push the boundaries of what is possible when designing an aqua park.

INSPIRE CREATIVE FREE PLAY

Aquaglide products are designed to inspire creative free play. Participants entertain themselves, without being lead by staff.

This design allows users to session at their own pace, engaging with each park piece in the order of their choosing.

INNOVATION

Aquaglide components have always been designed to easily interconnect. Any of our items have been able to connect using our exclusive Vario-Lock cinch strap system with our Speedways and Swimsteps.

We are proud to have developed a connection system that has proven to be a game changer for our industry. Our Universal Connection System allows unlimited park designs. This octagon shaped platform allows our Speedway and Swimstep connections to connect to all eight sides at once offering multiple angles and unlimited possibilities for aqua park design. The Universal can be used as a hub, a corner or anything in between. Park layouts can be changed quickly and easily which allows your aqua park to evolve, so adding new exciting components is easy. With our system, you are able to start with our smallest aqua park layout, and then use all the existing components as your aqua park grows larger.

HIGH PRESSURE TECHNOLOGY (HP)

Our HP construction utilizes high quality drop stitch material that can withstand an internal pressure of up to 20 psi (1,4 bar) without damage. This is 10 times the design working pressure! Here we use the HP material at a very acceptable 2 psi (0,14 bar), keeping it so far below its break strength that durability is never an issue.

These products are subject to extreme abuse from toes, heels, knees & elbows. They also take the worst of daily pressure extremes due to thermal expansion from the sun.

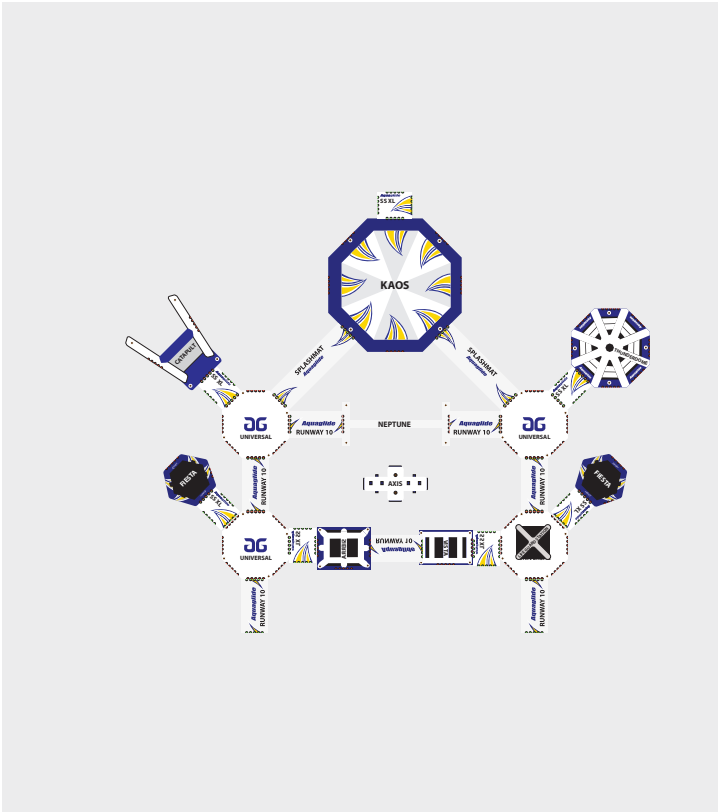

Other advantage of HB material is that it offers a smooth, flat, low-profile platform that is much easier to board from the water.

VARIO-LOCK CINCH STRAP

Strong, simple connections between products are crucial to the safe operation of any aqua park. Our unique Vario-Lock cinch strap system sets the standard for safe, durable aqua park connections and can be found on virtually every Aquaglide product. Each Vario-Lock cinch strap connects to heavily-reinforced, marine-grade stainless rings mounted on permanent weld plates.

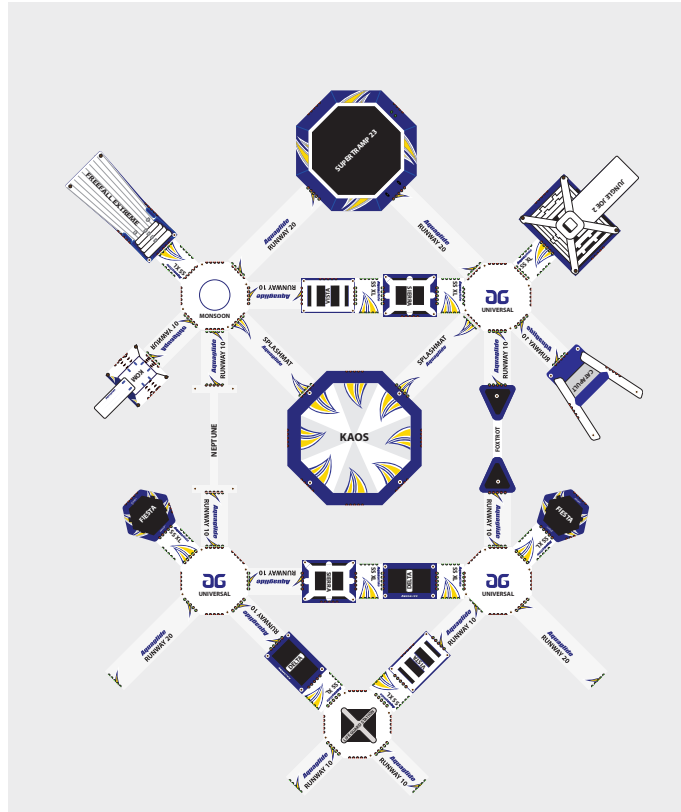

AQUA PARK STYLES

TRADITIONAL

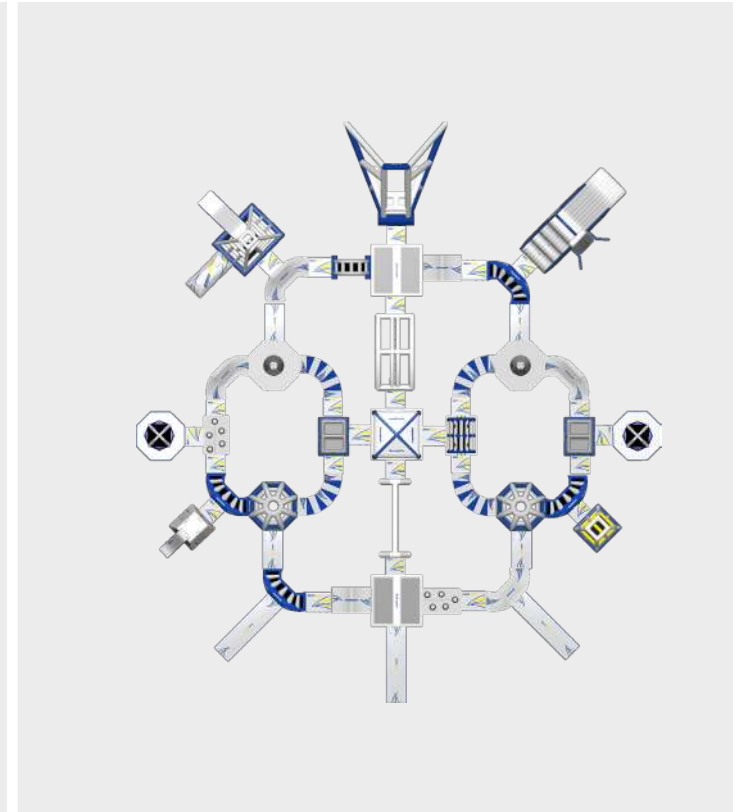

Simplified paths allow large signature items and exciting features to stand out.

CIRCUITS

Our Circuit collection offers more challenging obstacle sections with alternate pathways anchored by larger signature items.

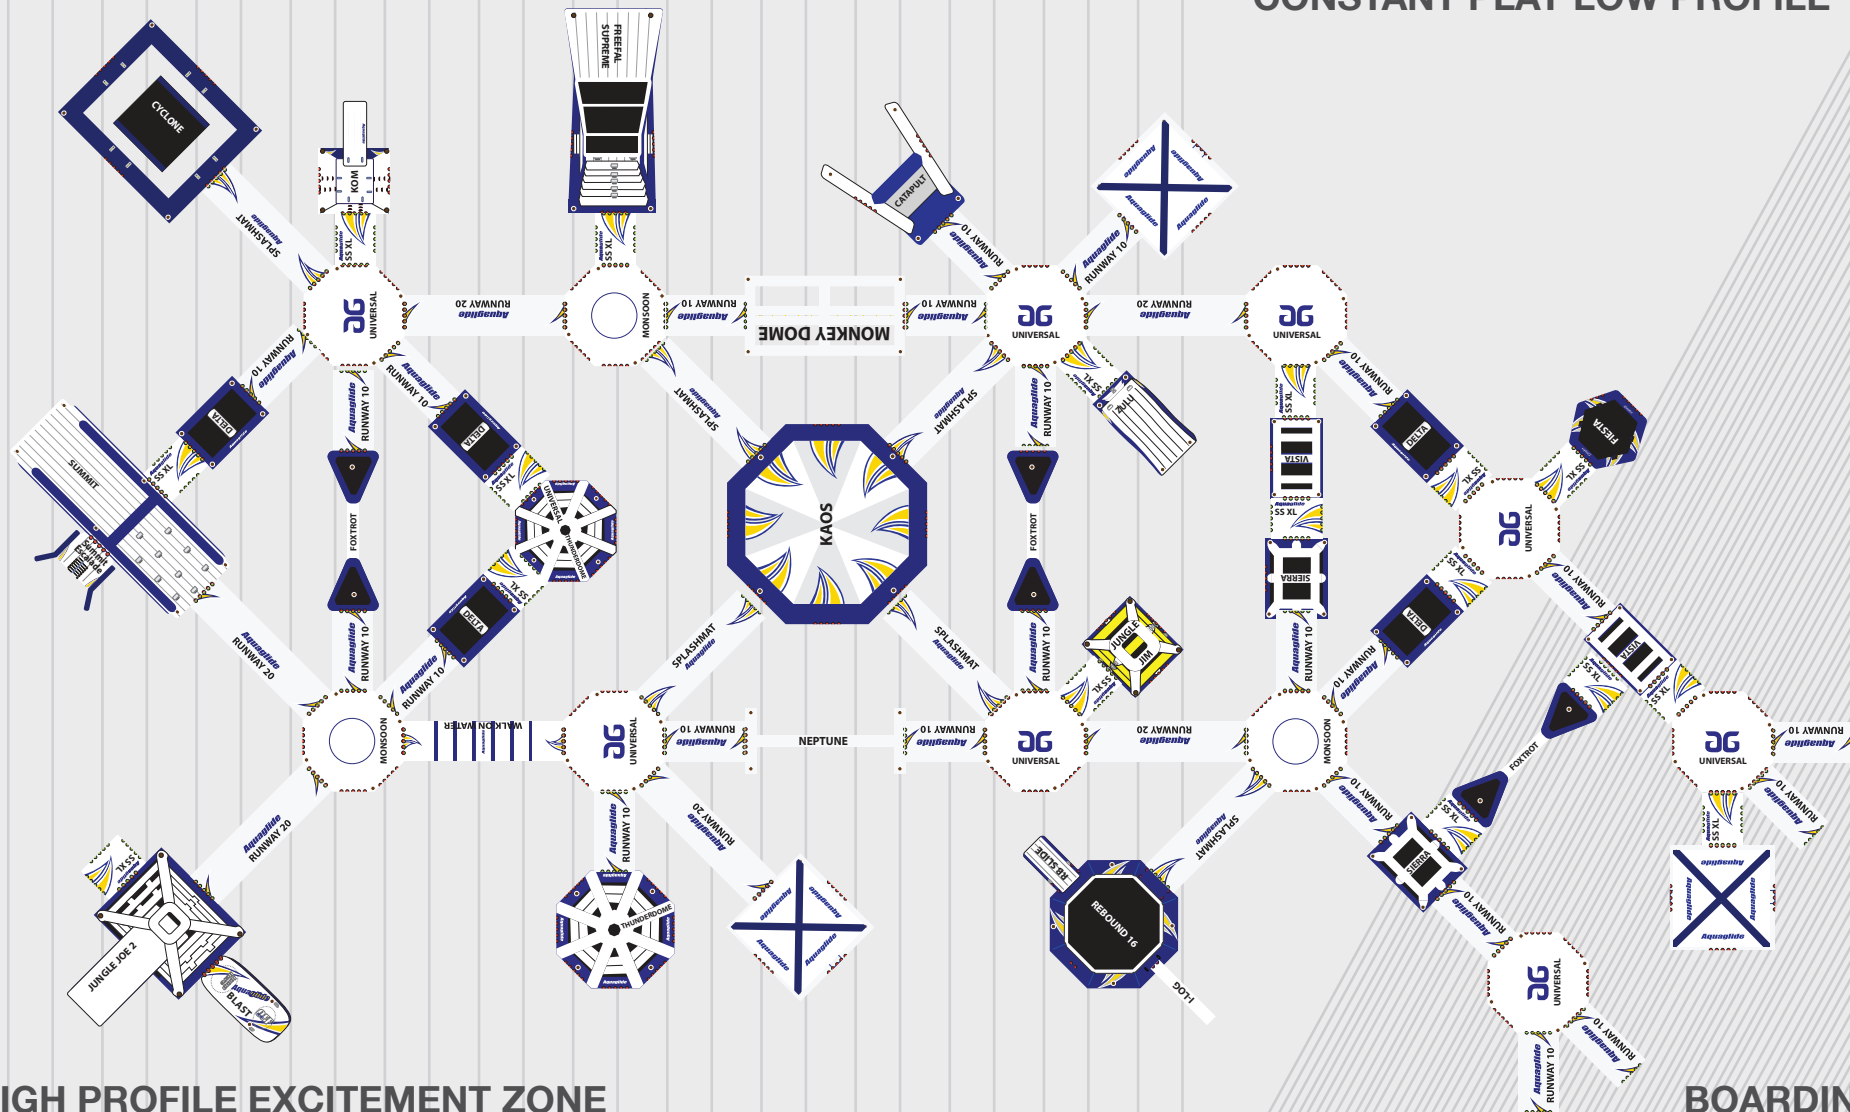

RINGS

Ring designs feature enhanced challenge sections in a racetrack style.

AQUA PARK ZONES

CONSTANT PLAY LOW PROFILE

HIGH PROFILE EXCITEMENT ZONE

BOARDING ZONE

HIGH PROFILE EXCITEMENT ZONE

Aquaglide park designs are crafted to guide participants toward areas where they are most comfortable. More daring participants are often drawn to pieces offering excitement, height and deep water presented by high profile excitement zones. Large-scale features provide big thrills for those confident enough to try them. Demanding challenge sections and technical features test the skills of any user. Younger or more timid participants can also still venture safely, and expand their level of play.

CONSTANT PLAY LOW PROFILE

This area serves as a destination for families and younger participants as well as a resting and transitional zone. Make no mistake, there's plenty of fun and excitement to be had here, but the challenges are more moderate and social spaces more prevalent. Water depth transitions here from shallow to deep. Team-building and cooperation skills are emphasized in this zone where anything is possible and there's something fun for everyone!

BOARDING ZONE

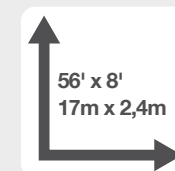

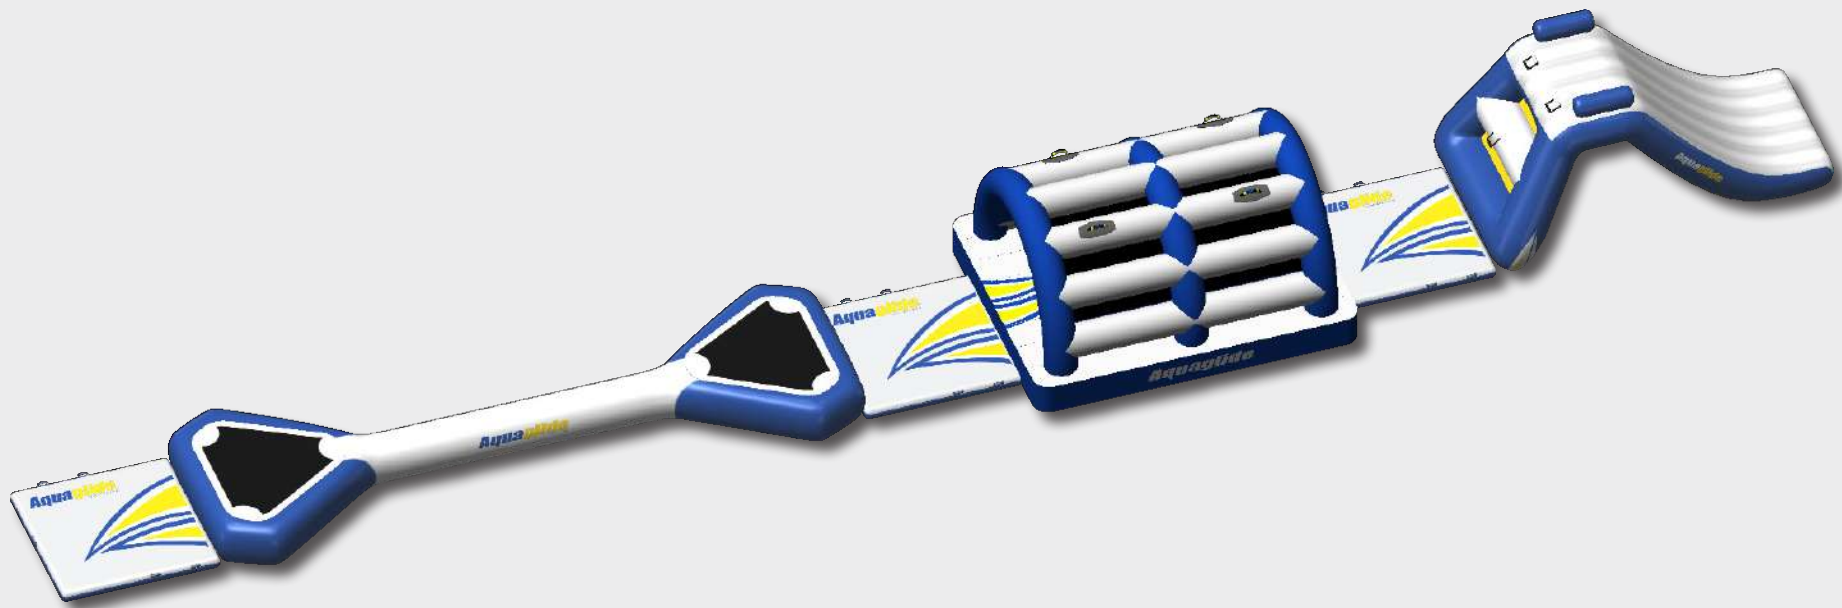

The boarding zone typically occupies shallow water depths and allows participants to safely transition to their preferred area in the park. This zone can be purely boarding-oriented, but it also provides the potential to encourage young families and the youngest participants to test the waters of aqua park fun and excitement with low-profile challenges and comfortable resting spaces.

AQUATRAINER MAT

The best way to train is on water

The AquaTrainer mat provides a fun and dynamic way to exercise on the water. Its unique design allows for physical aquatic therapy, boot camp type workouts, aquatic YOGA and Pilates. The ability to be used in both pools and open water makes it a best-in-class floating training platform that will elevate anyone's training to the next level. The light weight and stable design allows for maximum stability while being very easy to carry and set up due to its small footprint. Utilizing commercial grade materials and drop stitch construction will provide years of use. Specially placed marine grade #316 Stainless Steel D- Rings allow it to be tethered to existing pool lane dividers or anchored down in any body of water using traditional anchors, moorings or sand bags.

SUNDECK

Makes the perfect island for swimming, playing or lounging

In a resort setting, floating platforms can easily double beach revenues when added to an existing chair/umbrella program. By incorporating platforms into an aqua park design to increase parental participation, parents are given a place to rest and families can also congregate during aqua park use. The durable construction allows it to be anchored all season long, if necessary. Includes 8 D-rings on the top for attaching accessories such as the softpack, or a way to attach other watercraft such as waverunners or SUP boards.

The Sundeck Softpack is a must have accessory for anyone serious about lounging. The Softpack connects to the Sundeck through our D-ring Interloc system using a simple strap.
